

FOR THE ULTIMATE REPAIR

Kasi-4B

Four-ton capacity, trailer mounted, asphalt storage unit and transporter.

The Kasi 4-B is designed to maintain 4 tons of hot asphalt at plant mix temperature for up to 48 hours in any weather. The 4-B can be used in combination with an infrared heater for permanent infrared restorations, or simply to make hot asphalt available whenever and wherever it is needed.

The design, workmanship and materials incorporated in all Kasi Equipment are exceptional.

FEATURES and SPECIFICATIONS

GENERAL

Through the use of a precisely controlled infrared heating system, the Kasi 4-R will maintain 4 tons of virgin asphalt at plant mix temperatures for up to 48 hours. The 2 rear doors discharge asphalt to a 30" high shoveling platform.

SYSTEMS

Electrical: A self-contained 12 volt electrical system with built in battery maintainer provides all the power necessary for the electronic controls.

Heaters: The heating system consists of two-37,000 BTU infrared converters. The heat is controlled by both thermostats and cycle timers to insure that the asphalt is not damaged while being stored.

Propane: Propane is supplied by 2 -100 lb. vapor draw gas cylinders (optional).

SAFETY

- Excess flow check POL valves.
- A cutoff switch for the unit is located inside a lockable panel to prevent tampering.

DIMENSIONS

- **LENGTH:** 14' -2"
- **WIDTH:** 7'-3"
- **HEIGHT:** 7'-6"
- **TOP DOORS OPEN**
WIDTH: 8'-8'
HEIGHT: 8'-9"
- **TARE WEIGHT:** 3,950 lbs. (without LPG cylinders, asphalt or options)
